01 PROFILE

I build software because I enjoy turning ideas into something real. Alongside my degree in computer science, which I am about to complete, I run the website of our family business and work on my own projects. Curious, reliable, and always ready to learn something new.

02 WORK EXPERIENCE

Junior Project Manager · Amstein + Walthert AG

2025 – present

- Project management and technical planning of electrical engineering projects
- Superuser for CAD/BIM tools (Revit, ePlan, Trimble Nova)
- DevOps support for Revit
- Supervision and mentoring of apprentices

Electrical Designer · HKG Engineering AG

2023 – 2024

- Creation of technical plans and schematics
- Client communication as well as planning and coordination support

Certified Electrician · Eglin AG · Swisspro AG · Melcom AG

2021 – 2023

- Installation, service, and maintenance of electrical systems
- Troubleshooting and technical customer support

03 PROJEKCTS

FisherTechService – Website & Dashboard

fishertechservice.ch

Development and operation of the family business website featuring responsive design, a contact form, and a service gallery, plus an internal dashboard for managing service requests.

ChessGame – Desktop-Application

github.com/VeljkoIvic/ChessGame

Object-oriented software development, databases, web technologies, and software architecture, with hands-on projects.

Portfolio Websites

veljkoivic.ch

Concept, design, and development of several portfolio websites, including my own personal site showcasing projects, skills, and career path, as well as individual sites for acquaintances.

Mobile Budget App

Mobile app for budgeting and bookkeeping by scanning invoices and receipts.

Velventure (Vordiplomarbeit)

Travel planner built as a WPF application with multiple API integrations (OpenAI, Google Maps, image services).

04 EDUCATION

Computer Science Technician, Advanced Federal Diploma of Higher Education

2024 – 2027

Object-oriented software development, databases, web technologies, operating systems, and software architecture with hands-on project work.

Certified Electrician · Vocational Apprenticeship

2017 – 2021

Installation, maintenance, and repair of electrical systems, as well as reading and implementing technical schematics.
